

PROCEDURE GME12

Subject: RESIDENT EVALUATION

Effective Date: OCTOBER 2004

Applies to:
THE METHODIST HOSPITAL—MEDICAL CENTER

Date Revised/Reviewed:
JANUARY 2010

Originating Area:
GRADUATE MEDICAL EDUCATION COMMITTEE

Target Review Date: JANUARY 2012

I. GENERAL STATEMENT

Each Program of graduate medical education (GME) must develop academic requirements for the educational development of its Residents. To advance in the Program, the Resident must demonstrate the appropriate competence as defined by the Program and its specialty. Thus, each Program must use the goals and objectives of its educational framework to construct an evaluation system that defines the knowledge, skills, professional behavior, and experiences expected of Residents. The evaluation system should substantiate that Residents demonstrate achievement in the six General Competencies of patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice.

II. PROCEDURE

- A. Purpose: The first goal of a Program should be to assist all Residents to improve, including those with satisfactory and unsatisfactory performances. To do this, the Program must use methods that produce an accurate assessment of Residents' performance in the six General Competencies and should provide both formal and informal Feedback to Residents. Evaluations of Residents should be used to make decisions about promotion, Program completion, remediation, and any disciplinary action. The procedures for each of these actions are specified in other policies, including GME06 and GME10.
- B. General Requirements: The evaluation system must be communicated to and understood by the Faculty and Residents. Written evaluations of Residents should be performed at least twice a year and conform to the applicable Program Requirements. Program Directors must meet with each Resident at least semiannually (and more frequently with those experiencing difficulties) to discuss their performance. This formal evaluation includes a review of the interim evaluations and additional information from other measures of Resident performance. A written summary of the evaluation, generated and signed by the Program Director and the Resident, should be placed in the Resident's file. Residents should be given the opportunity to indicate in writing when they disagree with the written evaluations or the summary.
- C. Standards of Evaluation: The Program's standards of evaluation must be applied equally to all Residents, assure due process, and, wherever possible, be published and available to Residents.

- D. Written Notification of Negative Evaluation. Residents should be notified promptly in writing of any Negative Evaluation. Programs should ensure that Residents sign any Negative Evaluations and all semi-annual evaluations.
- E. Resident Record: Each Program will maintain a record of evaluations for each Resident that is accessible to the Resident and other authorized personnel. The permanent records of evaluation and any counseling sessions must be maintained in the Resident's file.
- F. Final Evaluation: Each Program Director must provide a final or summative evaluation for each Resident who completes the Program. The evaluation must include a review of the Resident's performance during the final period of training and must verify that the Resident has demonstrated sufficient competence to enter practice without direct supervision. The final evaluation must be part of the Resident's file maintained by Methodist and must be accessible for review by the Resident.
- G. Evaluation of Residents Who Leave the Program Prior to Completion. Each Program Director must provide timely verification of residency education and summative performance evaluations for Residents who leave the program prior to completion. This evaluation must describe the resident's performance in each of the ACGME general competencies and overall. This evaluation should be completed at the time that the Resident leaves the Program. This evaluation must be part of the Resident's file maintained by Methodist and must be accessible for review by the Resident.
- H. Evaluation of Program and Faculty. An evaluation system must include the process and opportunities for Residents to evaluate Faculty performance and Program effectiveness in writing and confidentially at least annually and for the Faculty to evaluate the Program.
 - a. All Residents must complete evaluations of their Programs and Faculty on the interval scheduled by the Program, which must at least be annually.
 - b. All Residents must complete the Annual Survey of Residents' Educational and Clinical Experiences administered by the GME Department.
 - c. All Faculty must complete the Annual Survey of Program administered by the GME Department.
 - d. The Program must document formal, systematic evaluation of the curriculum at least annually. The Program must monitor and track resident performance, faculty development, graduate performance (including performance of program graduates on the certification examination), and program quality. The Internal Review must assess each Program's efforts toward annual improvement in these categories.
 - e. The Program must use the results of Residents' assessment of the Program together with other Program Evaluation results to improve the program. If deficiencies are found, the Program should prepare a written plan of action to document initiative to improve performance in the areas listed above (III.H.d.). The action plan should be reviewed and approved by the teaching faculty and documenting in meeting minutes.

IV. COMMITTEES REVIEWING OR APPROVING PROCEDURE:

1. Graduate Medical Education Committee [14 October 2004] [revised 8 November 2007][14 January 2010]
