COVID-19 Vaccine Consent Form

Please read the COVID-19 Vaccine Information Fact Sheet for the vaccine you or your child is receiving, if you have not done so already.

If you are the parent or legal guardian of a child under the age of 18 who is to receive the COVID-19 vaccine, the following information applies to the child.

Consent

By signing this form, you are requesting to receive the COVID-19 vaccine. Depending on which vaccine you are receiving and the indication for it, you will receive one of the following: Pfizer, Moderna, Janssen, or Novavax vaccine. If seeking a booster dose of a COVID-19 vaccine, you may receive a different authorized or approved COVID-19 vaccine than your primary series. You can ask the vaccine provider which vaccine you are receiving. You are not required to take this vaccine.

The significant known and potential risks of the Pfizer COVID-19 vaccine includes: injection site pain, arm pain, fatigue, headache, muscle pain, chills, joint pain, fever, injection site swelling, injection site redness, nausea, malaise, lymphadenopathy, severe allergic reactions (including anaphylaxis and other hypersensitivity reactions such as rash, pruritus, urticaria, angioedema), non-severe allergic reactions (such as rash, itching, hives), decreased appetite, diarrhea, vomiting, syncope (fainting), myocarditis, and pericarditis. Please see the FDA Pfizer Vaccine Information Fact Sheet or the FDA Pfizer Vaccine Information Fact Sheet for Children (as applicable), for more detailed information.

The significant known and potential risks of the Moderna COVID-19 vaccine include: myocarditis, pericarditis, injection site reactions (pain, tenderness, and swelling of the lymph nodes in the same arm of the injection, swelling or hardness, and redness), fatigue, headache, muscle pain, joint pain, chills, nausea and vomiting, fever, rash, severe allergic reaction, non-severe allergic reactions, and syncope (fainting). Please see the FDA Moderna Vaccine Information Fact Sheet for more detailed information.

The significant known and potential risks of the Janssen COVID-19 vaccine include: injection site reactions (pain, redness, swelling), headache, fatigue, myalgia, nausea, fever, diarrhea, vomiting, swollen lymph nodes, severe allergic reaction (including anaphylaxis), unusual feeling in the skin (such as tingling or a crawling feeling or decreased feeling in the skin), persistent ringing in the ears (tinnitus), blood clots (thrombosis) with or without low platelets (thrombocytopenia), capillary leak syndrome, and Guillain Barre syndrome. Please see the FDA Janssen (Johnson & Johnson) Vaccine Information Fact Sheet for more detailed information.

The significant known and potential risks of the Novavax COVID-19 vaccine include: myocarditis, pericarditis, injection site reactions (pain/tenderness, swelling, redness and itching), fatigue or generally feeling unwell, muscle pain, headache, joint pain, nausea, vomiting, fever, chills, severe allergic reactions (including anaphylaxis), non-severe allergic reactions (such as rash, itching, hives), and swollen lymph nodes. Please see the FDA Novavax Vaccine Information Fact Sheet for more detailed information.

In addition, taking the COVID-19 vaccine may not protect all recipients.

The benefits to the COVID-19 vaccine include a significant reduction in the risk of contracting COVID-19 and being able to transmit it to others and even higher reduction in the risk of severe disease, hospitalization and/or death from COVID-19.

The Pfizer, Moderna, Janssen, and Novavax COVID-19 vaccines are the only ones currently authorized or approved (as applicable) by the FDA. There are no other approved or authorized vaccines available for you.
COVID-19 Vaccine Consent Form

Acknowledgment

By signing this form, you hereby acknowledge and agree to the following statements:

- If you experience any severe allergic reactions (e.g., difficulty breathing, swelling in face or throat, rash all over your body, dizziness or weakness, fast heartbeat that is new), you will call 911.
- You acknowledge that you have read the applicable FDA Vaccine Information Fact Sheet for the vaccine you are to receive.
- You understand that even after you receive the COVID-19 vaccine, you should continue safety practices such as wearing a face mask, social distancing, and frequent hand washing.
- You understand that protection against COVID-19 may not be effective until at least 7 days after the single dose administration for the Janssen COVID-19 vaccine and may not be effective until at least 7 days after the second dose for the Pfizer, Moderna or Novavax COVID-19 vaccines.
- You understand that if you are requesting a booster dose you may receive any of the Pfizer, Moderna, or Janssen vaccines.
- You agree that if you are receiving a booster, you have waited the FDA recommended time from either your last booster or the last shot of the primary series.
- You agree that you are not allergic to any of the ingredients in any of the vaccines. If you are, you will immediately notify the provider before you receive the vaccine. The ingredients of each vaccine are listed on the next page.
- You agree that you will notify the provider giving you the vaccine of any serious health conditions you have before you receive the vaccine.
- You understand that you are encouraged to download and use the V-safe app on your phone to report any side effects or adverse reactions you may have. This will help the government and the CDC monitor any side effects or adverse reactions from the vaccine.

COVID-19 Vaccine Consent Form

*Pfizer COVID-19 Vaccine*

The Pfizer vaccine includes the following ingredients:
- mRNA = BNT162b2 RNA
- ALC-0159 = 2[(polyethylene glycol)-2000]-N,N-ditetradecylacetamide
- potassium chloride
- monobasic potassium phosphate
- dibasic sodium phosphate dihydrate
- ALC-0315 = (4-hydroxybutyl)azanediyi bis(hexane-6,1-diyl)bis(2-hexyldecanoate)
- 1,2-Distearoyl-sn-glycero-3-phosphocholine
- sodium chloride
- sucrose

*Moderna COVID-19 Vaccine*

The Moderna vaccine includes the following ingredients:
- messenger ribonucleic acid (mRNA)
- lipids (SM-102, polyethylene glycol [PEG] 2000 dimyristoyl glycerol [DMG], cholesterol, and 1,2-distearoyl-sn-glycero-3-phosphocholine [DSPC])
- tromethamine
- tromethamine hydrochloride
- acetic acid
- sodium acetate trihydrate
- sucrose

*Janssen/Johnson & Johnson COVID-19 Vaccine*

The Janssen vaccine includes the following ingredients:
- recombinant replication-incompetent adenovirus type 26 expressing the SARS-CoV-2 spike protein
- citric acid monohydrate
- trisodium citrate dihydrate
- ethanol
- 2-hydroxypropyl-β-cyclodextrin (HBCD)
- polysorbate-80
- sodium chloride
COVID-19 Vaccine Consent Form

*Novavax COVID-19 Vaccine*

The Novavax vaccine includes the following ingredients:

- SARS-CoV-2 recombinant spike protein
- Matrix MTM adjuvant containing saponins derived from the soapbark tree
- cholesterol
- phosphatidylcholine
- potassium dihydrogen phosphate
- potassium chloride
- disodium hydrogen phosphate dihydrate
- sodium chloride
- disodium hydrogen phosphate heptahydrate
- sodium dihydrogen phosphate monohydrate
- polysorbate 80
- water for injection
- sodium hydroxide (for pH adjustment)
- hydrochloric acid (for pH adjustment)
- may also contain residual amounts of baculovirus and Sf9 cell proteins, baculovirus and cellular DNA, lentil lectin, methyl-α-D-mannopyranoside, simethicone, Triton X-100, and Tergitol (NP9)
