VISITOR SAFETY:

To keep you as safe as possible, please follow these guidelines when visiting COVID-19 patients in isolation:

- Properly wear a face mask (covering your mouth and nose), face shield, gown and gloves while in the patient's room.

- Do not eat or drink while in the patient's room.

- Wash hands or use hand sanitizer often, including when entering the hospital and when entering and exiting the patient's room.

- Visiting patients who are receiving continuous high-risk procedures or treatments is restricted while the treatment is ongoing, even if it lasts a few days.
