

# Global Education & Training: I HEAL

## Radiologic Technologist Program

### **Radiologic Technologist Program – New Technologies in Imaging**

Learners via the Radiologic Technologist Program will gain exposure to the latest technology and procedures in medical imaging as well as gain insight into the efficient processes of patient flow. This program is uniquely positioned before *National Radiology Week* giving learners the opportunity to participate in the *Houston Methodist Radiologic Seminar* and the additional learning and networking opportunities that this event brings.

Learners who participate with this program will see how Houston Methodist is leading efforts in radiology imaging and will gain the clinical experience of Houston Methodist is setting high standards in the field. Through the Radiologic Technologist Program, care teams work to optimize patient flow and provide cutting edge diagnostic services with the use of the latest technology operated by seasoned clinical leaders.

**Target Audience:** Radiology Technician Program Managers and Managers in-training

### **Program Objectives:**

- Develop an understanding of the Houston Methodist structure and ICARE values which propel the institution's patient care success.
- Gain exposure to an acuity and variety of patient cases.
- Exposure to the latest technologies and imaging equipment (e.g. New GE Revolution Scanners...).
- Learn efficient processes in patient flow to increase patient volume and serve more patients in less time.
- Receive 8 CE credits (for professionals licensed with the ARRT).

### **Program Outline:**

The Global Education & Training team will evaluate the CV of each participant match them with seasoned preceptors in their specialty for the observership. Concluding the observership, all participants can participate in the Annual Seminar in Radiology held at Houston Methodist. A list of speakers and topics will be forthcoming.

- **Wed, Nov 1:** Welcome Breakfast, 3-day Radiologic Technologist Observership
- **Saturday, Nov 4:** Attend the Houston Methodist 11<sup>th</sup> Annual Seminar in Radiology
- **Sunday, Nov 5:** Departure

### **Program Cost:**

Contact Global Education Office for pricing. International learners are responsible for airfare, hotel accommodations and transportation. Houston Methodist Global can provide guidance on accommodation options.

### **Houston Methodist Global Health Care Services (HMG)**

HMG is committed to building health care capacity globally through transferring best practices. HMG offers educational programs designed for health care providers and professionals at every stage in their career, providing these individuals with the opportunity to learn using the most advanced technology and processes from HMG. With experienced faculty, established educational infrastructure, and training expertise, HMG has proven ability in coordinating, developing and delivering exceptional educational programs.

The above program is part of HMG's Revolving Education Development Series which is divided into two initiatives: the Innovative Leadership Experience And Development program (I LEAD) which targets clinicians and non-clinicians interested in enhancing their leaderships skills and advancing their institutions overall operations, and the Integrated Health Education And Leadership program (I HEAL) which targets clinicians only and allows learners to immerse themselves quickly in a specific health care topic of interest for a shorter duration period.
