A PROACTIVE APPROACH
One out of eight women will be diagnosed with breast cancer. Seventy-five percent of women diagnosed with breast cancer have no family history of the disease and are not considered high-risk.

Houston Methodist Breast Care at San Jacinto Hospital partners with you to focus on early detection of breast cancer. As research and technology advances, we're committed to adopting the safest and most progressive treatment options for breast cancer.

Breast health begins with monthly self-exams beginning at age 20. Healthy women ages 40 and older should undergo annual mammograms, screening for early signs of breast cancer.
