Women’s Pelvic Floor Issues
They’re more common than you think.

1 in 4 suffer from a pelvic floor disorder

17% of women suffer from urinary incontinence, making it the most common pelvic floor disorder

Women with at least one pelvic floor disorder will increase from 28.1 million in 2010 to 43.8 million in 2050

Women with urinary incontinence will increase 55%

Women affected by fecal incontinence will increase 59%

Women with pelvic organ prolapse will increase 46%

As many as 58.2 million women are expected to suffer from a pelvic floor disorder by the year 2050, likely due to longer lifespans and an increase in adult obesity.
